#### APPENDIX I: BACKGROUND INFORMATION AND SCORING SYSTEM

#### 1.0 Background

- 1.1 In reference to the 139<sup>th</sup> meeting of the SUA Council held on 1<sup>st</sup> October 2015, it was approved that "University-wide Website Committee (UWC) shall approve the ranking of websites of university units" (ICT Guidelines No 186-188). It was approved that website ranking should be done at least once per Quarter and the leading units will be rewarded while the units that will be losing for two consecutive years will be penalized.
- **1.2** The UWC in its 6<sup>th</sup> meeting held on 23<sup>rd</sup> November 2015, approved the scoring system, the Google webmaster Tools and other ICT measures to be used for ranking the units websites.

### 2.0 The scoring System

- **2.1** The 6<sup>th</sup> meeting of UWC approved the scoring system (Table 1) in which five criteria toprovide the points were approved.
- **2.2** *Visibility/metadata:* This is information about data stored in a database. Normally, metadata information is used by search engine (such as Google) to index web information.
- **2.3** *The number of clicks:* These depict the importance of the website that users visit. This means that the website is visible to the users and contains the information that the users want.
- **2.4** *Incoming links/external links:* These are the number of the links in which other websites refer to SUA website. They are called referring domains. SUA website is mentioned in the collaborating institutions websites.
- **2.5** *Internal links:* These are the number of the pages in which a website possesses. A page may carry pdf, doc, pictures, normal html contents, videos and so on. The size of the website is determined by the number of the internal links
- **2.6** Updates and responsiveness: This is the way units-website representatives respond to thewebsite contents uploading.

SN	CRITERIA	POINTS (%)
1	Visibility/Meta data information/Appearance	10
2	Visibility/ Number of Clicks	10
3	Visibility/Importance Number of Incoming links (referring domains)/external links	40
4	Size of the website/ Number of Internal Links	30
5	Updates and Responsiveness	10

#### 3.0 Methodology Used

- **3.1** Data was collected from 67 units of the University based on the criteria mentioned in Table 1above using the approved tool.
- **3.2** Data used to calculate the ranking results mentioned is shown in Table 2, Table 3, Table 4and Table 5. Appendix
- **3.3** A threshold value was generated for each criterion, which lead to obtain the points for each criterion.
- **3.4** So, the points for each criterion were obtained by the formula:

Specific data for each criterion collected over threshold value of the specific criterion timespoints generated for each criterion.

#### 4.0 Methodology used to obtain winner in publications

Data was collected between 17<sup>th</sup> and 24<sup>th</sup> January 2024, using individual staff profiles on Google Scholar Citation index whereby the top 50 most cited profiles in SUA institutional profiles were selected and arranged according to the Department each staff comes from and their citations were added to obtain total, then the total difference of citations between November 2023 and March 2024 were obtained to find number of citations each unit gained in this quarter and unit with more citations was ranked high.

# 5.0 RANKING RESULTS
